

Profile Summary

Full Stack Developer with 4+ years of experience building enterprise web applications, EDI integrations, and cross-platform clients using C#, ASP.NET, .NET MAUI, and Django. Delivered production systems spanning B2B transaction processing, a face recognition attendance platform, and responsive business websites — backed by strong backend (SQL Server, REST APIs) and frontend (React, Bootstrap, XAML) skills. MCA graduate seeking a Full Stack Developer role to own features end-to-end.

Education

Master Of Computer Application – M.C.A	2024 - 2026
□ PES Institute Of Technology and Management Percentage – 97%	
Bachelors Of Computer Application – B.C.A	2018 - 2022
□ PES Institute Of Advanced Management Studies Percentage - 84%	
Class XIIth	2016 - 2017
□ Govt. Girls PU college Percentage – 58%	
Class Xth	2014 - 2015
□ Paper Town High School Percentage – 76%	

Technical Skills

- **Coding Languages:** Python | C# | .NET | JAVA | KOTLIN | HTML | CSS | JS
- **Framework & Technologies:** ASP.NET | MVC | .NET MAUI | React JS (production experience) | Bootstrap | Django | REST API (design & integration) | Fast API | Tailwind CSS
- **Frontend & Design:** Responsive Design (Flexbox, Grid, mobile-first)
- **Markup & Templating Languages:** XAML | CSHTML | XML | JSON
- **Databases:** MySQL | SQL Server | SQLite | PostgreSQL (basic) | MongoDB (basic)
- **EDI Technologies:** EDIFACT | ANSI X12
- **Auth & Security:** JWT | OAuth2
- **Testing & QA:** Functional & System Testing | API Testing | Regression Testing | Test Case Design | Defect Tracking & Documentation | UAT Support
- **Cloud & DevOps:** Azure (basic) | Docker (basic)
- **Development tools:** Visual Studio | Visual Studio Code | SSMS | Postman | Git | GitHub

AI Development Skills & Tools

- **Claude AI** - debugging, API design assistance, documentation generation
- **Stitch AI** - UI prototyping and design-to-code workflows
- **Git Capilot** - code completion, refactoring, boilerplate generation

TgL Communications, Auburn, USA – EDI and Web Developer

Mar 2022 – Present

EDI Development & Integration:

- Built and maintained B2B EDI integrations using C#, ASP.NET, and .NET, processing invoices, purchase orders, and shipment transactions across trading partners using EDIFACT and ANSI X12 standards.
- Owned EDI mapping, validation, and transaction monitoring end-to-end, reducing manual data-exchange errors through structured validation logic.
- Managed transaction data and query optimization in SQL Server (SSMS), supporting reliable, auditable business document processing.
- **Technologies** – C#, ASP.NET, .NET Framework, EDIFACT, ANSI X12, XML, JSON, SQL Server, FTP, SFTP, HTTPS, VAN, EDI Mapping & Troubleshooting.

Inventory Management Software Development:

- Developed core modules of an Inventory Management System in ASP.NET MVC, covering stock tracking, transaction workflows, and operational reporting.
- Built analytics/reporting features using DevExtreme, giving management real-time visibility into inventory movement.
- **Technologies** – ASP.NET MVC, C#, SQL Server, DevExtreme, Inventory Management Systems.

Business Websites:

- Delivered responsive, production websites (HTML/CSS/Bootstrap/JS) for international B2B clients — including **COSMOIND** (a US-based electrical and piping products/services company) and **Hudson Jung** (a West Orange, NJ acupuncture practice) — translating each client's industry needs into clean, mobile-friendly interfaces that improved online presence and user engagement.
- **Technologies** – HTML, CSS, Bootstrap, React, JavaScript, Responsive Web Design, UI Development.

Face Recognition Attendance System:

- Designed and built the frontend for a face-recognition-based employee attendance system using .NET MAUI, XAML, and CSHTML — covering attendance capture, image capture, dashboard navigation, and export features.
- Integrated the frontend with face-recognition REST APIs, coordinating data flow between the Android capture client and backend services.
- Optimized Android-side (Kotlin/CameraX) image processing pipeline, cutting end-to-end face-verification latency from ~2000ms to ~850–900ms by eliminating a redundant image-conversion step and tuning API timeout/compression settings.
- **Technologies** – UI/UX Design, Stitch AI, Claude AI, Kotlin, C#, XAML, CSHTML, React, HTML, CSS, REST API Integration, Frontend Development.

Pacific Gaming Private Limited, Bangalore, India

Feb 04 2022 – June 10 2022

Process Associate

- The main role is to assist the gamers in chat.
- Provided real-time customer support to gamers through live chat by resolving gameplay, account, and technical issues efficiently.
- Assisted players with inquiries, troubleshooting, and issue resolution while maintaining high customer satisfaction and service quality standards.
- Achieved strong customer satisfaction performance through quick response handling and effective communication skills.
- Maintained accurate documentation of customer interactions, issue reports, and resolutions in compliance with company policies and support procedures.
- Collaborated with technical and support teams to escalate complex player concerns and ensure timely issue resolution.

- **Skills** – Customer Support, Live Chat Support, Issue Resolution, Communication, Troubleshooting, Documentation, Team Collaboration.

Internship Experience

NewGen Softech, Bangalore, India

Feb 2026 – May 2026

Python Backend Developer Intern

- Built RESTful APIs in Python/Django (DRF) for LMS and Digital Ledger applications, covering authentication, CRUD, and role-based access.
- Implemented backend logic for user management, transaction handling, inventory tracking, and reporting; collaborated with frontend developers on API integration.
- Debugged and optimized backend performance across both projects.
- **Technologies** – Python, Django, Django REST Framework (DRF), SQLite/MySQL, REST API, Git, HTML, CSS, Bootstrap.

Academic Projects

AI Music Studio

- Developed an AI-powered music generation system that autonomously creates drum patterns using Google's Magenta drumsRNN model. Implemented sequence generation techniques with Recurrent Neural Networks (RNN) to compose realistic and dynamic drum sequences. Integrated tempo and rhythm control features for interactive jamming experiences.
 - Technologies – Python, TensorFlow / Magenta, RNN, drumsRNN, melodyRNN, MIDI, Music Theory.

Learning Management System Using Django

- Developed a scalable web-based Learning Management System (LMS) using the Django framework to manage courses, student enrolments, assignments, quizzes, and progress tracking. Implemented secure authentication and role-based access control for students, instructors, and administrators. Designed RESTful APIs for seamless frontend-backend integration and optimized database operations for efficient performance. Integrated features such as course content management, attendance tracking, notifications, and online assessments to enhance the digital learning experience.
- Technologies – Python, Django, Django REST Framework (DRF), SQLite/MySQL, HTML, CSS, React, Bootstrap, JavaScript, REST API, Authentication & Authorization

Digital Ledger System

- Developed a full-stack digital ledger management system for medical shops using Django and Python, handling both frontend and backend development. Built responsive user interfaces for medicine inventory, billing, supplier management, and financial transaction tracking. Implemented backend functionalities for stock management, expiry monitoring, automated ledger entries, invoice generation, and profit/loss analysis. Designed secure authentication, role-based access control, and RESTful APIs to ensure efficient data management and seamless system performance.
- Technologies – Python, Django, Django REST Framework (DRF), SQLite/MySQL, HTML, CSS, React, Bootstrap, JavaScript, REST API, Inventory Management, Authentication & Authorization.

Computer Cursor Control System using Facial Gestures

- Designed and developed a Python-based real-time application enabling hands-free computer interaction for individuals with physical challenges. The system utilizes facial gestures for seamless and intuitive control of the computer cursor, eliminating the need for hands or external devices. Collaborated with end-users, implemented robust error handling, and optimized the system for maximum accessibility.
- Technologies – Python, NumPy, OpenCV, Dlib, PyAutoGUI, Imutils.

Online Health Care System Using Python

- Designed and developed the front-end and back-end of a healthcare portal, which facilitates efficient and seamless management of user authentication, patient records, doctor information, laboratory data, and inventory details.
- Technologies – Python, HTML, CSS, React, MySQL.

Image Caption generation Using Python

- Designed and developed an Image Caption Generator using deep learning techniques to automatically generate captions for images. Implemented a Convolutional Neural Network (CNN) for feature extraction with Long Short-Term Memory (LSTM) for generating textual descriptions. Utilized the Flickr8k dataset for training and validation.
- Technologies – Python, TensorFlow / Keras, CNN, LSTM, NLP.

Certifications

- Blazor & .Net Core Web API Full stack Web Development | Udemy | 2026
- Artificial Intelligence: Search Methods for Problem Solving | IIT | 2026
- Research Methodologies and IPR | VTU | 2025
- Python Programming Foundation | Apponix Academy | 2023
- Python and Machine Learning | Perfect Plan E Learning Private LTD | 2023
- Power Python | Ludifu | 2022.
- Python Workshop | Skillslash Academy | 2022

Interests

- Playing Guitar, Badminton, and board games, sketching, and reading social articles.
